EXTINGUISHER  
TRAINING**

# LIVE-FIRE EXTINGUISHER TRAINING

THE STAFFORD FIRE MARSHAL'S OFFICE IS OFFERING TRAINING TO OUR COMMUNITY, INCLUDING HIGH RISK POPULATIONS, ON PROPER FIRE EXTINGUISHER USE WITH A BULLEX INTELLIGENT TRAINING SYSTEM™ (I.T.S.). USING A CONTROLLED, PROPANE-BASED FIRE TO RECREATE AN INCIPIENT STAGE FIRE. THE I.T.S. IS DESIGNED TO TEACH THE "P.A.S.S. METHOD" IN THE CLEANEST, SAFEST WAY POSSIBLE.

DESIGNED WITH A UNIQUE FLAME-RESPONSE TECHNOLOGY THAT DETECTS THE TRAINEE'S AIMING AND SWEEPING MOTION, THE SYSTEM AUTOMATICALLY VARIES THE FLAME IN RESPONSE, PROVIDING A REALISTIC TRAINING EXPERIENCE. BECAUSE THE TRAINING EXTINGUISHERS USE READILY AVAILABLE AIR AND WATER, INSTEAD OF COSTLY DRY CHEMICAL OR CO2, MULTIPLE TRAINEES CAN SAFELY TRAIN IN A SINGLE SESSION.

THE I.T.S. IS A SIMPLER, SAFER WAY TO PROVIDE LIVE FIRE EXTINGUISHER TRAINING TO EVERYONE IN OUR COMMUNITY. SAFELY PROVIDE EMPLOYERS WITH OSHA-REQUIRED FIRE EXTINGUISHER TRAINING AT THE WORKPLACE. I.T.S. IS IDEAL FOR THESE TRAINING OPPORTUNITIES AND MORE.

## FEATURES AND BENEFITS

### Training Made Easy

The I.T.S. comes complete with everything you will need for fire extinguisher training. A field rechargeable air/water Smart Extinguisher® eliminates extinguisher recharge costs and the need to clean up dry-chemical after a training session.

### Effective Training

Extremely low operating costs mean you can train as many individuals as needed and train as often as you like. Select class A, B or C fires at four different difficulty levels to challenge trainees.

### Safe Training

The trainer can control the intensity of the flames and utilize the emergency stop switch on the handheld controller at any time. A motion sensor shuts down the flames instantly if the system is bumped or knocked, making BullEx live-fire training systems the safest live-fire simulators available.

### Cost Effective

Because there is no longer a need to discharge and recharge costly dry-chemical or CO2 extinguishers, BullEx live-fire extinguisher training systems are often more cost effective.

### Clean

Uses clean burning propane gas to generate flame output with no cleanup needed of dangerous and hazardous chemical associated with actual extinguishers.

### Trackable results

A visual display shows the time of each successful training session, allowing you to track the performance of trainees each year.

### Reliable and Durable

The I.T.S. System is constructed with stainless steel components and designed to withstand repeated use.
